

COOKIE POLICY

Last Updated: July 31, 2026

This Cookie Policy explains how QuestGuard uses cookies and similar technologies when you access or use the Service.

This Policy should be read together with the Terms of Service and Privacy Policy.

1. WHAT ARE COOKIES?

Cookies are small text files placed on your device by websites and online services. They allow websites to recognize your browser, remember preferences, maintain authenticated sessions, improve performance, and collect information about how the Service is used.

QuestGuard also uses technologies that perform similar functions without technically being cookies, including Local Storage, IndexedDB, Session Storage, and other browser storage mechanisms. For the purposes of this Policy, references to "cookies" include these technologies unless the context requires otherwise.

2. WHY QUESTGUARD USES COOKIES AND SIMILAR TECHNOLOGIES

QuestGuard uses cookies and browser storage to:

- authenticate users;
- maintain secure login sessions;
- remember user preferences;
- improve website performance;
- reduce unnecessary network requests;
- cache application data;
- preserve unsaved work;
- remember interface settings;
- analyze usage of the Service;

- improve reliability and functionality;
- protect the Service against abuse, fraud, and malicious activity;
- support future features and integrations.

Cookies and similar technologies are not used to sell your personal information.

3. LOCAL DEVICE STORAGE

QuestGuard is a web application and relies heavily on browser storage technologies in addition to traditional cookies.

These technologies improve performance and user experience while reducing unnecessary downloads.

Local Storage

QuestGuard may use Local Storage to store information such as:

- application preferences;
- interface settings;
- theme preferences;
- temporary drafts;
- unpublished user-generated content;
- game state;
- locally cached information necessary to prevent accidental loss of work.

For example, Local Storage may preserve changes while a user is editing content so that closing or refreshing the browser does not immediately result in lost work before the content is published.

Local Storage remains on your device until it is removed by you, overwritten by the application, or otherwise cleared by your browser.

IndexedDB

QuestGuard may use IndexedDB to store larger amounts of application data locally, including cached game content and downloadable resources.

Its purposes include:

- improving loading performance;
- reducing repeated downloads;

- minimizing bandwidth usage;
- allowing portions of the Service to remain responsive even after temporary connectivity interruptions.

Deleting IndexedDB data will not normally affect your Account but may require QuestGuard to download application data again.

Session Storage

QuestGuard may use Session Storage for temporary information required only during an active browser session.

Information stored in Session Storage is generally removed when the browser session ends.

4. CATEGORIES OF COOKIES

QuestGuard may use the following categories of cookies and similar technologies.

Strictly Necessary Cookies

These cookies are required for the operation of the Service.

They may be used to:

- authenticate users;
- maintain login sessions;
- protect against malicious activity;
- provide security features;
- balance network traffic;
- remember security preferences;
- ensure reliable operation of the Service.

Without these technologies, portions of QuestGuard may not function correctly.

Because these cookies are necessary for the operation of the Service, they generally cannot be disabled through the cookie preference system.

Functional Cookies

Functional cookies improve usability by remembering information such as:

- interface preferences;
- theme settings;
- language preferences;
- navigation preferences;
- application state;
- cached content;
- user interface customization.

These cookies enhance convenience but are generally not required for the basic operation of the Service.

Analytics Cookies

QuestGuard may use analytics technologies to understand how the Service is used.

These technologies may collect information including:

- pages viewed;
- features used;
- navigation patterns;
- browser information;
- approximate geographic region;
- operating system;
- device type;
- session duration;
- performance metrics;
- error reports.

QuestGuard currently plans to use Google Analytics and related Firebase analytics services.

Analytics technologies help us understand how the Service performs and identify opportunities for improvement.

Where required by applicable law, analytics cookies will only be used after obtaining your consent.

Marketing Cookies

QuestGuard does not currently use advertising or behavioral marketing cookies.

In the future, QuestGuard may integrate advertising or marketing platforms, including services such as Google Ads or similar providers.

Should such technologies be introduced, this Cookie Policy will be updated accordingly and, where required by applicable law, your consent will be obtained before such cookies are placed on your device.

5. THIRD-PARTY SERVICES

QuestGuard relies upon third-party providers that may place cookies or use similar technologies while providing services.

These providers may include:

- Google;
- Firebase;
- Google Analytics;
- Cloudflare;
- Stripe;
- GitHub;
- content delivery providers;
- embedded media providers;
- other infrastructure providers necessary for the operation of the Service.

QuestGuard does not control the cookies placed by third-party providers acting under their own privacy policies.

Users are encouraged to review the privacy documentation of those providers.

6. EMBEDDED THIRD-PARTY CONTENT

Certain pages of the Service may include embedded content or links to third-party services.

Examples may include:

- YouTube videos;
- Discord widgets;
- GitHub-hosted resources;
- externally hosted documentation;

- payment providers;
- other embedded media or interactive content.

Such providers may place their own cookies or use similar technologies in accordance with their own policies.

QuestGuard has no control over these technologies.

7. AUTHENTICATION

QuestGuard currently uses Google Authentication through Firebase Authentication.

Authentication technologies may store information necessary to:

- maintain authenticated sessions;
- remember signed-in users;
- prevent unauthorized access;
- improve security.

Future versions of QuestGuard may also use additional authentication technologies, including secure session tokens, JSON Web Tokens (JWTs), or similar mechanisms where appropriate.

Such technologies will only be used to operate and secure the Service.

8. COOKIE CONSENT

Where required by applicable law, QuestGuard will request your consent before placing non-essential cookies on your device.

Users may generally choose to:

- accept all cookies;
- reject non-essential cookies;
- customize cookie preferences.

You may change your preferences at any time through the cookie settings made available by the Service, where applicable.

Rejecting certain cookies may reduce the availability or functionality of some features.

9. MANAGING COOKIES

Most web browsers allow you to:

- view stored cookies;
- delete cookies;
- block cookies;
- block third-party cookies;
- clear Local Storage;
- clear IndexedDB;
- clear Session Storage.

Removing cookies or browser storage may:

- sign you out of QuestGuard;
- remove locally stored drafts;
- remove cached content;
- require downloaded resources to be downloaded again;
- reset user preferences.

Removing locally stored drafts or unpublished content may permanently delete information that has not yet been synchronized with the Service.

Users are encouraged to publish or otherwise back up important work before clearing browser storage.

10. FUTURE TECHNOLOGIES

QuestGuard is an actively evolving platform.

As new features, services, integrations, or infrastructure are introduced, additional cookies or browser storage technologies may become necessary.

Material changes to QuestGuard's use of cookies will be reflected in this Cookie Policy.

Where required by applicable law, additional consent will be obtained before introducing new categories of non-essential cookies.

11. CHANGES TO THIS POLICY

QuestGuard may update this Cookie Policy from time to time.

The most current version will always be made available through the Service.

Material changes may be communicated through the Service or by other reasonable means where appropriate.

Continued use of the Service following the effective date of an updated Cookie Policy constitutes acknowledgment of the revised Policy where permitted by applicable law.
